

Honolulu Science Café

If you like to talk science with a glass or a fork in your hand, please come to our next Honolulu Science Café meeting at

JJ's Bistro

3447 Waialae Avenue in Kaimuki (between 9th and 10th Avenues)

Tuesday March 19th

Social/dinner hour from 6 pm: talk starts 7 pm

Everybody welcome: no admission charge

Note that JJs is BYOB, but Tamura's liquor store is right across the street.

Shepherd Myers

The Role of Natural History Collections

The Bishop Museum natural collections contain over 22.3 million specimens of plant and animal life derived from century-long history of exploration throughout all the Hawaiian Islands and Pacific Ocean.

Shepherd Myers - the collection manager for the L. Gressitt Center for Research in Entomology - will discuss the how these collections are maintained and organized, and how they are utilized in research, exhibitions, education and outreach activities
